Community Funding Summary

Analysis of 2025 contribution derived from current estimates and assumptions

Cover Average Costs

\$129,224

Trends Toward 0% Funded

Ongoing funding at or below this level is not sustainable. It will cover costs in average years but will not increase savings, which will be exhausted by above-average years as inflation erodes purchasing power. At this funding level it's not a question of if you will need additional funds, but when.

2025 Funding

\$150,000

Trends Toward 61.6% Funded

Consists of a \$150,000 planned contribution.

Will tend to increase % funding from year-end estimate of 39.4% funded.

Established Target

\$152,837

Trends Toward 70% Funded

Amount required to average the selected target % funding level over the long term. Achieving a flat % funding level is only possible at 100%. In practice, the % funded figure will be higher following periods of below-average costs and lower following above-average costs.

Full Funding

\$162,957

Trends Toward 100% Funded

Continuous funding at this level is not strictly necessary as the only time full funding is required is when every recurring expense lines up in the same year. The Cash Flow analysis can be used to determine a sustainable funding target.

| Category | Full Funding | % of Total |
|-------------|--------------|------------|
| Amenities | \$3,863 | 2.4% |
| Electrical | \$1,482 | 0.9% |
| Elevators | \$22,133 | 13.6% |
| Exterior | \$30,899 | 19.0% |
| Fire Safety | \$2,585 | 1.6% |
| HVAC | \$34,153 | 21.0% |
| Interior | \$21,860 | 13.4% |
| Mechanical | \$2,791 | 1.7% |
| Plumbing | \$5,959 | 3.7% |
| Roof | \$12,895 | 7.9% |
| Site | \$24,337 | 14.9% |
